WORK EXPERIENCE

Software Engineer (full-stack) **May 2026 – Aug 2026**

Wellix*card (medical serverless website)* *Alexzandria, Egypt (Remote)*

- Built a full-stack bilingual medical directory (Next.js 16, TypeScript, Prisma, PostgreSQL) listing doctors, hospitals, pharmacies, and labs across Egypt.
- Implemented an admin CMS with JWT auth, Zod-validated forms, ImageKit media uploads, and Leaflet map pickers.
- Delivered AR/EN + RTL support with cookie-based locale switching and bilingual JSON content.
- Built client-side search/filter (specialty, location, price, rating, availability) over SSR-loaded data.
- Added an SEO pipeline: dynamic metadata, medical JSON-LD schemas, DB-driven sitemap, and Open Graph images.

Software Engineer (Frontend) **Mar 2024 – May 2025**

Fully Charged (CMS Dashboard) *Dubai, UAE (Remote)*

- Spearheaded the refactoring and optimization of station, charger, and subscription management, improving system reliability and efficiency for both the company and system sides.
- Revitalized the user interface and tables across dashboards and promo offers, boosting usability and engagement by 25% through Shadcn UI and boosted data workflows.
- Successfully merged EMSP and OCPI APIs, enabling seamless charger operations, real-time transaction updates, and enhanced billing accuracy.
- Implemented advanced analytics and visualization for daily/monthly charger metrics, improving data comprehension and decision-making by 40%.

Software Engineer (Frontend) **Sept 2024 – Nov 2024**

WthQ *Riyadh, KSA (Remote)*

- Developed a user-friendly interface for managing over 500+ advertisements and merchant agreements.
- Automated the documentation workflow, cutting the time required for contract generation by 40%.
- Integrated real-time notifications to improve communication and response time by 30%.
- Reduced document management errors by 25%, enhancing overall operational efficiency.

Software Engineer (Frontend - Next.js) **Dec 2024 – Jun 2025**

Dabbo (Internship), *Alexandria, EG (onsite)*

- Optimized web application performance by 30% through the implementation of server-side rendering with Next.js, resulting in faster load times and enhanced user engagement.
- Reduced page load times by 20%, directly contributing to an enhanced user experience and higher retention rates.
- Played a key role in agile development, driving a 15% increase in team productivity by efficiently managing tasks and iterations.

EDUCATION

Bachelor's degree in Management Information Systems, Faculty of Business, Alexandria University | Minor: Software Development (CGPA: 3.02) **Sept 2020 – Jun 2024**
